An electrochemical platform
for studying biomembrane
processes
Mercury-supported biomimetic membranes

LAP Lambert Academic Publishing Jun 2014, 2014. Taschenbuch. Book Condition: Neu. 220x150x8 mm. Neuware - Tethered bilayer lipid membranes, tBLMs, are biomimetic membranes consisting of a lipid bilayer interposed between the aqueous solution and a hydrophilic chain, called spacer, anchored to a metal electrode, which are used to incorporate single peptides or membrane proteins, so as to elucidate their structure-function relationships. Hg is a particularly convenient supporting electrode material for tBLMs thanks to its liquid state, which imparts to the...

Reviews

A top quality ebook and the typeface used was interesting to read through. It is rally intriguing throug reading through period. You wont feel monotony at anytime of the time (that's what catalogues are for relating to when you ask me).
