

## Modulation Response of Twin Optically Coupled Diode Lasers

Filesize: 6.15 MB

### **Reviews**

*This publication is wonderful. It is amongst the most remarkable pdf i have got read. Its been written in an exceptionally basic way and it is merely after i finished reading through this pdf in which really transformed me, alter the way i really believe.*

## MODULATION RESPONSE OF TWIN OPTICALLY COUPLED DIODE LASERS

To save **Modulation Response of Twin Optically Coupled Diode Lasers** eBook, remember to click the hyperlink beneath and save the ebook or have access to additional information which might be in conjunction with MODULATION RESPONSE OF TWIN OPTICALLY COUPLED DIODE LASERS ebook.

Biblioscholar Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x6 mm. This item is printed on demand - Print on Demand Neuware - The modulation response of twin optically coupled diode lasers is investigated by modeling the dynamics of the system with a set of single mode rate equations. Steady states of the system are derived analytically or calculated numerically when an analytic expression is not easily available. The stability of the steady states is examined by using a linear stability analysis, which is also used in an algorithm that calculates the infinitesimal modulation response. The modulation response is also calculated by using a numerical method that directly integrates the rate equations. Typical parameters for an InGaAsP diode laser are used in the algorithms to investigate mutual coupling and evanescent coupling. It is discovered that mutually coupled lasers can be effectively modulated out to frequencies of approximately 9GHz compared to 4GHz for a solitary laser. Large regions of the parameter space for evanescent coupling produce unstable steady states, but this is remedied by introducing asymmetric DC currents through the lasers or by introducing the effects of gain saturation. 92 pp. Englisch.
