Stenhouse Publishers, United States, 2011. Spiral bound. Condition: New. New.. Language: English . Brand New Book. When you talk with students about their number sense and computational skills, you re bound to uncover some surprising gaps in their understanding. Knowing how to identify and bridge those gaps is essential for helping students at all levels advance as mathematical thinkers. The Zeroing in on Number and Operations series, which aligns with the Common Core State Standards and the NCTM Standards on Focal Points, features easy-to-use tools for teaching key concepts in number and operations and for addressing common misconceptions. Sharing the insights they ve gained through decades of mathematics teaching and research, Linda Dacey and Anne Collins help you focus on what students really need to know and understand at each grade level. The modules for Grades Pre-K - K are organised into three sections: Numbers, Relationships, and Addition and Subtraction. Each module begins with the identification of its mathematical focus and the potential challenges and misconceptions associated with those ideas. In the Classroom then suggests instructional strategies and specific activities to implement with students. Meeting Individual Needs offers ideas for adjusting the activities to reach a broader range of learners. Most activities are supported by a reproducible (located in the appendix), and References/Further Reading provides resources for enriching your knowledge of the topic and gathering more ideas. At grades Pre-K and K, the authors focus on the key ideas that are essential for success at these levels: counting by rote, that is, saying the sequence of counting numbers in order counting rationally (with one-to-one correspondence and cardinality)subitizing, or recognizing setscounting by tens and ones making connections among representations of numbercomparing and ordering sets and numbers composing and decomposing numbersmodeling addition as the joining of setsmodeling subtraction as the separating of a...
