Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Auto-Cars: Cars, Tramcars, and Small Cars Although still in its infancy, the auto-car industry has lately made such gigantic strides that it would be impossible to deal exhaustively with it in this little book. Electricity, steam, compressed air, and last of all petroleum having each in turn been applied to the solution of this problem, we ought, to deal thoroughly with the subject, first to discuss the sciences of electricity, thermodynamics, and chemistry, and then go into the question of mechanics and its special application to the sources of energy with which we have to deal, a process entirely beyond the scope of the present work. We will therefore merely touch upon steam, electrical, compressed-air, and other motors, giving, however, a more detailed description of petroleum motors, which, in our estimation, seem to have a brilliant future before them. At the outset, however, we think it advisable to state the well-known fundamental laws of the thermo-dynamics of perfect gases, as these laws will be constantly referred to in this book. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
